SANGEETH KC

9746773195 | sangeethkcofficial@gmail.com | Portfolio | LinkedIn | Kerala

Professional Summary

Cloud and DevOps professional with hands-on experience in AWS, Kubernetes, Docker, and CI/CD pipelines. Expertise in developing scalable cloud architectures and automating deployments. Skilled in Laravel, React, and modern DevOps practices to ensure high performance and reliability. Passionate about solving complex technical challenges and staying updated with industry advancements.

Professional Experience

AWS Cloud Intern

F13 Technologies | Remote | September 2024 – January 2025

- Worked extensively with AWS services, including EC2, S3, and load balancers.
- Created Kubernetes deployment templates for optimized orchestration and scaling.
- Implemented CI/CD pipelines for automation of testing, building, and deployment processes using GitHub Actions.
- Enhanced skills in troubleshooting, cloud technologies, and operating system fundamentals.

DevOps Consultant (Freelance)

TiQr Events | Kannur, Kerala | October 2024 – November 2024

- Enhanced application response times by 20% through optimized Kubernetes orchestration with real-time monitoring via Datadog.
- Dockerized applications for streamlined, portable environments.
- Streamlined deployment processes, reducing errors by 30% using Dockerized environments and CI/CD pipelines.
- Enabled 99.9% application uptime through horizontal autoscaling.

Junior Software Developer

RSGP Consulting Pvt. Ltd. | Thiruvananthapuram, Kerala | August 2022 – September 2024

- Increased API performance by 40% through code optimization in Laravel.
- Leveraged Docker for reliable application deployments and Git for version control.
- Improved team efficiency by implementing Git-based workflows, cutting version control conflicts by 50%.

Customer Service Executive

Amazon | Remote | August 2021 – January 2022

- Delivered exceptional customer support, resolving issues related to orders, refunds, and package tracking.
- Guided customers for a seamless shopping experience and optimized problem resolution using internal tools.

Skills

- DevOps & Cloud Technologies: AWS (S3, CloudFront, EC2, IAM, DynamoDB, Route 53), Docker, Kubernetes, GitHub Actions
- Programming & Web Development: PHP (Laravel), JavaScript, React, MySQL
- Infrastructure Automation: Terraform, Ansible
- Other Tools & Technologies: HTML, CSS, PWA, Version Control (Git), Datadog Monitoring, Linux Administration

Certifications
- [AWS Cloud Quest: Cloud Practitioner](#) (Amazon AWS)
- [Git, GitHub, and GitHub Actions Crash Course](#) (Udemy)

Projects

MagicWord
- Developed a Word-to-XML converter application with Laravel and JavaScript.
- Implemented offline functionality using PWA for seamless user experience.

RVRite
- Collaboratively designed and developed a word document editor similar to Google Docs with a focus on structured XML conversion.
- Implemented version history management document templates and offline functionality using React js Laravel TipTap and MySQL.

[Cloud Resume Challenge](#)
- Hosted and deployed a resume website on AWS with serverless visitor tracking.
- Automated infrastructure with Terraform and set up CI/CD pipelines via GitHub Actions.

Education

Shipping Logistics & Supply Chain Management
STED Council | Kannur, Kerala | June 2017 – March 2018

- Focused on supply chain optimization and logistics management principles, contributing to problem-solving skills in complex environments.
